Digital Passport is an online curriculum designed to teach children how to safely and responsibly navigate the Internet. The courses can be accessed for free by the instructors, who are then able to monitor the students' progress. Digital passport lessons are presented as games that reward progress with badges. Students access their accounts via Destiny.

# Thank You!

Thank you to all the teachers, staff, and students for helping to make the library program a success.

Thank you to Mr. Navarro, the BGMS principal, and Mr. Rodriguez, the BGCS principal, for their continued support of the library program.

A special thank you to

Mrs. Loera for all her hard work during the 2013 - 2014 school year. The library program would not be a success without her!
